

## **Response procedure for missing or shifted markers**

All missing or shifted markers should be reported either by e-mail or voicemail to:

**Darrell Janke**

**e-mail:**     [darrelljanke@sympatico.ca](mailto:darrelljanke@sympatico.ca)

**telephone:** 705-879-3203

Please go to the marker maps tab and click on the [inset map](#) that displays the area of the lake where the marker is located. All the markers are now numbered for easy identification. **Please include the marker number in your e-mail or voicemail.**

The report will be acknowledged by Darrell within 24 hours and the marker problem will be addressed within 72 hours weather or other conditions permitting.

If your report is by voicemail please provide a call back number in the event that Darrell requires more information in order to identify the marker in question.

Please note that any requests for new markers should be made by e-mail directly to the association at [info@shadowlakes.on.ca](mailto:info@shadowlakes.on.ca) and not to the contractor. Please note that markers are generally not placed within 15 metres of the shore unless they are in a narrow main channel or in a high traffic area.
